ENGINEERING CHANGE NOTE (ECN)

PROJECT: PROJECT-ADDMOTOR
ORIGINATION: Kid Kidd
PURPOSE OF CHANGE: Motor Driven Fan
DOCUMENT NUMBER: ECN1.3
DATE OF PUBLICATION: 10/30/2026

LEAD ENGINEER: Kid Kidd, UMBC
TEAM LEAD: William Wang

EXECUTIVE SUMMARY:
The PROJECT-ADDMOTOR design was modified to add a motor driven fan. The customer and high-level technical requirements remain unchanged. Testing was extended to verify the addition of a motor driven fan.

HIGH-LEVEL DESCRIPTION:
Modify PROJECT-MYMILLIS to add a motor driven fan.

REASON FOR CHANGE:
Add a motor driven fan with 3 different operation levels that changes on user input from the press of a button.

Changed Documents:
[1] kiddKid.cmpe311.fall26.project#3 - 10/30/2026
The program design, source code, educational requirements, and testing/validation requirements were modified to add a motor driven fan.

Added Documents:
None

Removed Documents:
None

Replaced Documents:
None

Any Additional Design Considerations:
The motor driven fan should work without conflict from the LED or other design components.
